

Stryde

Take a stryde in the right direction.

The Problem

Running is booming — but it's still lonely.

Today, there is no way to run together, to compete, to compare or to just say to your friends, in different cities that let's run together.

Running need not be a stand-alone activity, it is something we can all do together in real-time and the way we want. Running needs to be reimaged, and that is how we unlock the next wave.

Market Size

TAM — Global Fitness Population **1 Billion+ People**

Over one billion people worldwide actively participate in fitness through gyms, clubs, or organized activity — representing the broad global audience for health and movement.

SAM — Global Fitness App Users **368 Million Users**

An estimated 368 million people globally use fitness and health apps, showing large-scale digital adoption of fitness tracking and engagement.

SOM — Fitness-Centric Strava Users (Bangalore + Hyderabad) **~500,000 Active Users**

Based on Strava India download data and modeled monthly activation rates, an estimated ~500K active running app users exist across Bangalore and Hyderabad — Stryde's initial launch wedge.

Some more numbers

1

Run clubs are exploding

- 1M+ clubs on Strava globally
- New clubs nearly quadrupled in 2025
- Running club participation grew 3.5× YoY
- Club-organized events increased 1.5× YoY

2

Gen Z is driving the movement

- 75% more likely than Gen X to say races/events motivate them
- 50%+ of Gen Z plan to use Strava more in 2026
- 30% of Gen Z plan to spend more on fitness

3

Mass events are scaling

- HYROX 2025: 550,000+ athletes, 80+ global races
- NMDC Hyderabad Marathon: 28,300 runners (record turnout)
- Wipro Bengaluru Marathon: 30,000+ runners.

4

Fitness is a trillion-rupee tailwind

- Global fitness industry: \$96B+ market size (health clubs alone)
- India fitness market projected to grow rapidly (double-digit CAGR)
- Global athletic footwear market: \$150B+

Our Solution

Stryde is running re-imagined.

Stryde turns running into a shared, real-time experience. It lets you run with friends across cities, compete on live and local leaderboards, and take part in structured challenges that make every run more engaging. Instead of logging miles after the fact, runners experience movement together—motivating each other, competing meaningfully, and staying consistent through social connection.

Product at a Glance

Nexus

Small group runs (2–6 people) with live pace, distance, and progress updates — even across cities.

Pulse

See how runners around you are performing in real time — by route, distance, and timeframe.

Quest

Short-term goals designed to add variety, motivation, and friendly competition to everyday runs.

How It Works

1

Create: Start a run with friends or join an existing group, regardless of physical proximity.

2

Go Live: Everyone starts running at the same time, with real-time updates on pace, distance, and progress.

3

Connect: See where your friends are in the run, track relative progress, and stay motivated through live presence.

4

Compete: Your run automatically feeds into live leaderboards based on location, route, and challenges.

5

Quests: Participate in structured challenges designed to add purpose and variety to daily runs.

6

Earn: Runs contribute to rewards, rankings, and long-term progress—keeping motivation high over time.

Why Now

Running is experiencing a global resurgence, driven by growing health awareness, flexible work, and a renewed focus on community. At the same time, people are more socially connected than ever, yet increasingly active alone. Advances in mobile technology, real-time location sharing, and social platforms now make it possible to turn running into a shared, live experience rather than a solitary habit. What's missing isn't interest or infrastructure—it's a product designed for how people want to move together today.

Value Proposition

For runners

- Run together, anywhere
- Real-time motivation
- Local competition
- Structured challenges
- Social accountability

For brands

- Authentic runner engagement
- Community-led campaigns
- Real-world participation
- Measurable impact

Differentiation

1

Real-time, together

Run simultaneously with friends across cities, not just compare results later.

2

Social by design

Built around shared runs, presence, and interaction —not feeds or likes.

3

Local Competition

Leaderboards and challenges grounded in place, routes, and communities.

4

Gamification that Lasts

Quests and rewards designed for consistency, not short-term hype.
